MCEP
6647 West St. Joseph Hwy.
Lansing, MI 48917
UPON COMPLETION OF THIS COURSE, YOU WILL BE ABLE TO:

- Use the Pediatric Assessment Triangle to form a general impression of a patient and determine treatment needs.
- Demonstrate procedural skills in airway and vascular management.
- Plan treatment for both common and life-threatening medical emergencies.
- Describe characteristics that make pediatric patients' response to injury and their treatment different from those in adults.
- Describe the diagnosis and management of specific diseases in newly born and newborn patients.
- Discuss clinical features and emergency management of central nervous system, surgical, metabolic, and cardiovascular disorders.
- Recognize and manage problems in children with special health care needs.
- Recognize common presentations of abuse and neglect, and explain the associated reporting requirements.
- Identify injuries and illnesses depicted in diagnostic images.
- Describe the development of safe and effective procedural sedation and analgesia practices.

CANCELLATION POLICY

All refunds must be requested in writing. If your written cancellation is received two weeks prior to the course date, you will receive a refund minus a $100 administrative fee and $90 text book fee. No refunds on cancellations received after April 12, 2020.
